ADRIAN CARNEIRO

FULL STACK DEVELOPER

I am a programmer passionate about application development and building useful, well-structured solutions. I have experience developing backend applications with Spring Boot, frontend applications with Angular, and mobile applications using Flutter, participating in multiple phases of the development lifecycle. I adapt well to new environments and technologies, and I highly value code quality, maintainability, and continuous learning. I also have a strong interest in artificial intelligence and enjoy exploring how it can be applied to solve complex real-world problems.
